

H.I.V.E. PROGRAM

(Happy, Interactive, Valued Education)

Our developmental, all-inclusive program features curriculum and group play that is designed to prepare your child for the primary grades, making the transition as comfortable as possible. Children will participate in activities and lessons that will develop in them a strong, educational foundation and improve motor skill development. Toddlers are given opportunities to work on the development of language skills, art, music, sensorial, and practical life, while making social connections and growing new relationships.

Lead Instructor: Sarah England

Quick little note about Ms. Sarah.....I am a mother of two who has dedicated the last ten years to helping little minds grow socially, emotionally, and academically. I absolutely love watching young children develop while playing and socializing. I find it rewarding to see the progress each child makes through the programming that I provide. I have strived to find activities that will enhance each child's growth.
